SUMMARY

Full-stack software engineer building AI-driven and data-focused applications. Experienced in developing scalable web platforms, integrating APIs, and designing efficient database systems. Background in sports analytics and high-performance environments enables strong problem-solving, attention to detail, and execution under pressure.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML, CSS

Frameworks: React, Next.js, Tailwind

Tools: Docker, Vercel, Git

Databases: PostgreSQL, MySQL

Concepts: REST APIs, Authentication, Full-Stack Development, Data Modeling

PROJECTS

InciSight (AI Beauty Ingredient Scanner)

- Built full-stack AI-powered app to analyze product ingredients with personalized insights
- Designed scalable database and scoring system for ingredient safety
- Developed modern UI using Next.js and Tailwind

TMDB Full-Stack App

- Built full-stack movie platform with Next.js and Flask API integration
- Implemented authentication and protected routes
- Integrated real-time external API data

Fitness Tracking App

- Developed full-stack app to track workouts and user progress
- Built REST APIs and relational database models
- Created responsive UI with dynamic state updates

EXPERIENCE

Sports Statistician — Genius Sports | 2024 – Present

- Managed real-time play-by-play data tracking with high accuracy
- Collaborated with officials to ensure data integrity

General Manager — Sherwin Williams | 2011 – 2022

- Increased annual sales by 17%
- Secured 100+ new accounts through targeted strategies

EDUCATION

Atlas School — Computer Science & Full-Stack Software Engineering (Graduated April 2026)
